SMALL DREAMS

Mirror Text Collection

Product Description

Small Dreams is a refined and intimate interpretation of the Mirror Text collection. Finely scaled typography is embedded within a laminated mirror structure, allowing text to operate subtly as a spatial condition rather than a dominant visual statement. The layered mirror construction generates restrained color transitions across the letterforms, while delicate shadows are cast onto the reflective galena mirror backing. The surface responds sensitively to light, distance, and movement, revealing its complexity gradually as the observer approaches. Rather than asserting presence through scale, **Small Dreams** invites close reading and attentive perception. The product is conceived for environments where atmosphere, tactility, and material nuance are discovered through proximity.
