## GREY INTERPOLATION

### Inter Textiles Collection

### Product Description

Grey Interpolation is a textile laminated glass that expands the Inter Textiles concept through a darker and optically stronger composition. White textile lines intersect with lines printed in grey paste, creating a structured surface where woven fibers, printed elements, and chemically opened zones interact across the glass. Selective chemical perforation opens parts of the textile membrane, allowing background views to pass through the surface while the remaining fabric diffuses light. The visible yarns and woven structure emphasize the physical nature of the textile, revealing depth and material honesty within the laminated glass.

Compared to White Interpolation, the grey composition increases contrast and visual density, producing a stronger architectural membrane. The surface balances openness and enclosure while maintaining the delicate texture of the textile structure.

### Material & Construction

- Laminated mirror glass
- Textile layer: woven textile with intersecting grey printed lines
- Chemically opened textile zones forming transparent perforations
- Intersecting textile and printed lines creating layered structure
- Exposed yarns and textile edges preserved within the laminate
- Double-sided visual depth through textile membrane and perforations

### Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

### Applications

Interior partitions · Space dividers · Lighting elements · Building facades

### Customization

Line density, color intensity, transparency ratio, textile type, and panel dimensions can be adapted according to project-specific architectural requirements.

### Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
