INTER STRETCH GREY

Inter Textiles Collection

Product Description

Inter Stretch Grey extends the Inter Textiles concept through controlled stretching of a textile membrane combined with a darker and optically stronger composition. Intersecting textile lines and grey printed elements are tensioned prior to lamination, creating localized openings where the textile structure expands and reveals its internal geometry. The stretching process produces a mesh-like surface where exposed yarns, open fibers, and overlapping lines generate subtle variations in density and transparency. Light passing through the stretched zones accentuates the textile structure, producing depth and a delicate interplay between opacity and translucency.

Compared to its white counterpart, Inter Stretch Grey introduces greater visual weight and contrast. The darker tonal composition strengthens the architectural presence of the material while maintaining the refined texture of the stretched textile membrane.

Material & Construction

- Laminated mirror glass
- Textile layer: white woven textile with printed white paste lines
- Chemically opened textile zones forming transparent perforations
- Intersecting textile and printed lines creating layered structure
- Exposed yarns and textile edges preserved within the laminate
- Double-sided visual depth through textile membrane and perforations

Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

Applications

Interior partitions · Space dividers · Lighting elements · Building facades

Customization

Stretch density, line structure, color intensity, textile type, transparency ratio, and panel dimensions can be adapted according to project-specific architectural requirements.

Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
