ETCH MIRROR SKETCH

Sketch Textile Series

Product Description

Etch Mirror Sketch is a laminated textile and mirror glass that combines chemical textile etching with mirrored drawing. The sketch motif is created by chemically removing selected fibers from the textile membrane, increasing translucency along the drawn lines. At the same time, a mirrored layer is applied to the glass following the same sketch pattern. This alignment creates a layered composition where etched textile and mirrored lines interact across the surface. As the observer moves, reflections appear and disappear, producing subtle flickering effects and shifting depth within the glass. From a distance, the surface reads as calm and refined. At closer range, the textile structure, etched lines, and mirrored strokes become visible, revealing a delicate dialogue between material softness and reflective precision. Etch Mirror Sketch introduces movement, reflection, and light modulation while maintaining architectural restraint.

Material & Construction

- Laminated textile and mirror glass
- Textile layer: chemically etched textile with sketch motif
- Mirror layer: silver mirror applied to glass following the same sketch pattern
- Etched textile structure preserved within laminated glass
- Visible textile fibers embedded within the laminate
- Double-sided visual depth through etched textile and mirror reflection

Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

Applications

Space dividers · Sliding walls · Architectural partitions

Customization

Sketch pattern, textile type, mirror finish, panel dimensions, and transparency levels can be adapted according to architectural project requirements.

Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
