ETCH SKETCH

Sketch Textile Series

Product Description

Etch Sketch is a laminated textile glass in which the sketch motif is formed by chemically removing cotton fibers from the textile membrane before lamination. The etched lines allow more light to pass through than the surrounding fabric, making the drawing visible as a subtle variation in translucency. The freehand motif recalls the spontaneity of sketching and intuitive mark-making, yet remains restrained and architectural. From a distance, the surface appears calm and uniform. As the observer approaches, the etched lines become visible, revealing the delicate structure of the textile preserved within the glass. Etch Sketch creates a quiet visual rhythm that supports architectural clarity while introducing expressive material detail. The product balances softness, light transmission, and hand-drawn character within a controlled architectural surface.

Material & Construction

- Laminated textile glass
- Textile layer: chemically etched cotton textile
- Sketch motif created through selective fiber removal
- Etched textile structure preserved within laminated glass
- Visible textile fibers embedded within the laminate
- Double-sided visual depth through textile structure and etched zones

Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

Applications

Partitions · Interior walls · Sliding panels

Customization

Sketch density, textile type, panel dimensions, and transparency levels can be adapted according to architectural project requirements.

Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
