OPEN VIEW

View Series

Product Description

Open View is a laminated textile glass in which visibility is shaped through precisely positioned perforations within the textile membrane. Selected areas of the fabric are chemically opened before lamination, creating controlled zones that function like windows embedded within the textile surface. The openings are arranged according to architectural sightlines, allowing specific views to pass through the glass while the surrounding textile diffuses light and softens the spatial environment. From a distance, the surface reads as calm and uniform. As one approaches, the openings reveal framed views and subtle variations in textile structure preserved within the laminate. Open View transforms transparency into a designed architectural element. Rather than providing continuous visibility, the glass guides the gaze and creates a layered relationship between enclosure, light, and view.

Material & Construction

- Laminated textile glass
- Textile layer: chemically opened textile membrane
- Positioned perforations forming controlled viewing zones
- Textile structure preserved within laminated glass
- Visible textile fibers embedded within the laminate
- Double-sided visual depth through textile structure and openings

Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

Applications

Facades · Interior partitions · Sliding panels

Customization

Opening position, textile type, panel dimensions, and transparency levels can be adapted according to architectural project requirements.

Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
