

# SILVIO AND SONS

## MORE VIEW

### View Series

### Product Description

More View is a laminated textile glass designed to provide the highest degree of openness within the View Series. The textile membrane is screen printed and chemically treated to create larger and more numerous translucent zones across the surface. These openings allow expanded visual connection through the glass while the remaining textile continues to diffuse light and soften the environment. From a distance, the surface reads as structured and architectural. As one approaches, the translucent zones reveal greater visibility and spatial depth. More View balances openness and privacy through selective transparency. Certain areas allow clear views while others remain filtered by the textile structure, creating a dynamic surface that responds to light, movement, and changing viewing angles.

### Material & Construction

- Laminated textile glass
- Textile layer: screen-printed textile membrane
- Selective chemical treatment creating enlarged translucent zones
- Textile structure preserved within laminated glass
- Visible textile fibers embedded within the laminate
- Double-sided visual depth through textile structure and open areas

### Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

### Applications

Residential facades · Commercial facades · Large-scale partitions

### Customization

Transparency ratio, textile type, printed structure, panel dimensions, and viewing zones can be adapted according to architectural project requirements.

### Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
